

From Scotland to Zimbabwe in 15 years

... this crane has seen some work!

ATLAS

CRANES UK LTD

The Atlas 100.1 A2 pictured here began life in Hamilton, Scotland in the year 2000 and has found its way to Kadoma, Zimbabwe and is still going strong.

Serial number 722314 was actually built in Hamilton, Scotland in year 2000 and was originally supplied to Travis Perkins PLC (suppliers of building materials in the UK) who will have used the crane for around 8 years before selling on the crane and truck as a package as they thought it had reached the end of its life. MAYBE FOR SOME CRANES BUT NOT FOR AN ATLAS.

The model pictured is the A2 version, which has a maximum hydraulic reach of 7.3M at which it can lift 1,400KG. The crane now spends its days in the sunshine recovering cars and working on a wide variety of other lifting duties.
